SIDIKI ISSA DIARRA

Senior Continuous Improvement Specialist | Operational Performance Analytics

Business Intelligence | Data Analytics | Reporting and Data Quality

+223 79 82 26 71 • sidikiissadiarra@gmail.com • Bamako, Mali

PROFESSIONAL PROFILE

Data and Business Intelligence professional with experience in reporting, data quality, analytics, and process automation across the telecommunications and mining sectors. Currently working as a Senior Continuous Improvement Specialist at Resolute Mining's Syama operation, leveraging data-driven insights, Power BI dashboards, and key performance indicators (KPIs) to optimize mining operations, improve operational efficiency, and support strategic decision-making. Skilled in SQL, Power BI, Excel, SAS, Python, R, and Tableau, with a strong focus on continuous improvement and digital transformation.

PROFESSIONAL EXPERIENCE

Resolute Mining Company | *October 2026 – Present*

Senior Continuous Improvement Specialist | Operational and Performance Analytics

- Business Intelligence and Performance Management: Develop and maintain dashboards, reporting systems, and KPIs to monitor operational performance and support data-driven decision-making.
- Continuous Improvement and Operational Excellence: Identify improvement opportunities, conduct root cause analyses, optimize processes, and improve productivity, equipment reliability, and operational efficiency.
- Cost Optimization and Strategic Decision Support: Analyze production performance, operating costs, and process efficiency to reduce losses, track improvement benefits, and support management decisions.
- Digital Transformation and Cross-Functional Collaboration: Automate reporting, explore AI-driven solutions, and collaborate with operational and support teams to promote a culture of continuous improvement and sustainable performance.

Orange Mali | *January 2025 – October 2026*

Reporting, Data, and Automation

- Continuously update customer databases to meet reporting requirements.
- Generate and process revenue and enterprise customer-base data for management reporting.
- Ensure the reliability, quality, and completeness of the data used.
- Develop and automate data processing from internal systems and tools.
- Contribute to the automation of periodic management reports.
- Create templates and dashboards for management reporting.

Faboula Gold | *December 2024 – January 2025*

Data Analysis and Reporting

- Collect and clean data.
- Create reports and dashboards for different departments.
- Interpret and analyze results.
- Collaborate with business teams.

Africa Equipment Maintenance and Services | *February 2023 – November 2024*

Performance Analysis and Management Reporting

- Drive performance through monthly analysis of departmental budget variances, identification of cost drivers, and KPI tracking.
- Prepare and present management reports and financial forecasts to executive leadership during monthly and quarterly reviews.
